

Implement a program on Packages

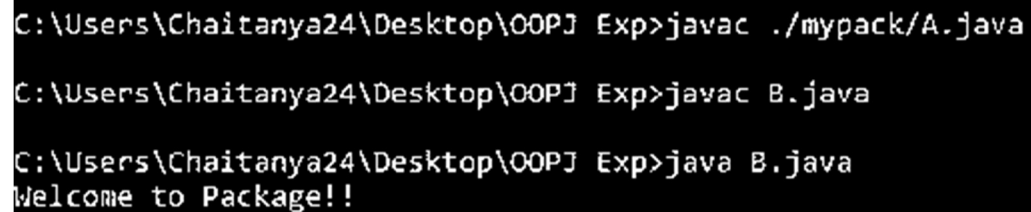

// Save In A.Java In A New Folder Pack2

```
package mypack;
public class A
{
    public static void msg()
    {
        System.out.println("Welcome to Package!!");
    }
}
```

// Save in B.java

```
package mypack;
import mypack.*;
class B
{
    public static void main(String args[])
    {
        A obj=new A();
        obj.msg();
    }
}
```

OUTPUT

```
C:\Users\Chaitanya24\Desktop\OOPJ Exp>javac ./mypack/A.java
C:\Users\Chaitanya24\Desktop\OOPJ Exp>javac B.java
C:\Users\Chaitanya24\Desktop\OOPJ Exp>java B.java
Welcome to Package!!
```
