Implement a program on Single Inheritance

```
class SingleInheritancetest{
    public static void main(String args[]){
        Dog d=new Dog();
        d.bark();
        d.eat();
    }
}
class Animal
{
    void eat(){System.out.println("eating...");
}
}
class Dog extends Animal{
    void bark(){System.out.println("barking...");
}
}
```

OUTPUT

```
C:\Users\User.DESKTOP-VKOH6B7\Documents\Java Projects>javac SingleInheritancetest.java

C:\Users\User.DESKTOP-VKOH6B7\Documents\Java Projects>java SingleInheritancetest.java
barking...
eating...
```
